

Our partnership with Carestream has helped solidify our commitment to innovation, quality, and providing affordable, high-performance solutions to our customers.

Strengthening Our Partnership with Carestream in the Philippines

Cebu Fedco Marketing Corporation and Leean Medical and Surgical Supply are Carestream's proud, long-standing partners in the Philippines, offering a complete range of Carestream products, including the Horizon X-ray System. In 2024, we secured 12 orders for the Horizon X-ray System: a significant accomplishment and a testament to its quality, reliability, versatility, and functionality.

The Horizon X-ray System stands out as a cost-effective, yet powerful solution that meets the rigorous quality standards of the Philippine healthcare industry. Its easy installation and minimal training requirements help provide further added value by ensuring a smooth transition to digital radiography (DR) workflow with minimal downtime.

Combined with the **Focus 35C Detector**, **DRYVIEW 5950 Laser Imaging Printer**, and **Image Suite Software**, the system can deliver a powerful, cost-effective DR solution. It has also generated significant interest among providers looking for an efficient workflow, more productivity, and high-quality, reliable imaging.

Carestream's Image Suite Software with Mini-PACS has helped elevate our customers' diagnostic capabilities, featuring several key features:

- A user-friendly interface that requires minimal training
- Advanced image processing tools for chiropractic and orthopedic images
- Cost-effective image archiving, viewing, editing, and reporting
- Offline image acquisition with up to 200 stored images on the detector
- Automatic Long-Length Imaging (LLI) for seamless stitching of images with minimal manual input

Testimonial | Cebu Fedco Marketing Corporation | Lean Medical and Surgical Supply

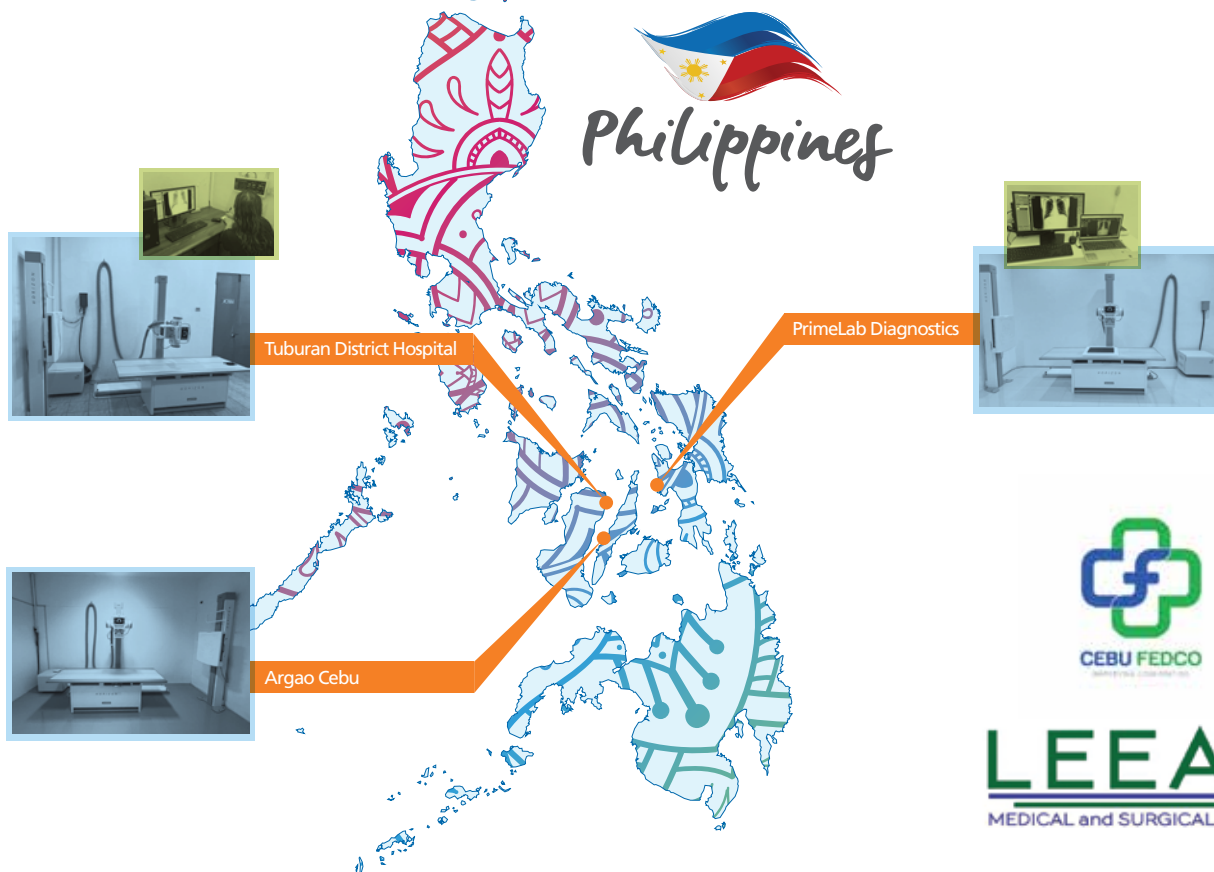

The **DRYVIEW 5950 Laser Imaging Printer** helps deliver a fully-digital capture-to-print experience, with:

- Exceptional film quality with long-term durability and archivability (up to 100+ years)
- Lower service and maintenance costs
- Mammography imaging capabilities – making it an excellent choice for providers seeking high-resolution imaging

By bundling the **Horizon X-ray System, Focus 35C Detector, and DRYVIEW 5950 Laser Imager**, we provide a comprehensive, end-to-end imaging solution that enhances workflow efficiency and boosts diagnostic confidence.

Our partnership with Carestream has helped solidify our commitment to innovation, quality, and providing affordable, high-performance solutions to our customers. We are confident we can meet the demands of the market and continue to deliver excellence.
