Carestream's DRX-Rise Mobile X-Ray System, Focus HD Detectors Now Available in the European Union

December 18, 2024

We are excited to announce that our DRX-Rise Mobile X-Ray System and Focus HD Detectors recently received European Union CE Marketing Approval and will soon be available for purchase in the European Union.

Our DRX-Rise Mobile X-Ray System is a fully integrated unit that delivers all the benefits of mobile DR, like improved performance, more productivity, and pristine image quality, for a new level of mobile imaging excellence. Whether your customers are converting to DR for the first time or looking for a way to expand their mobile fleet, the DRX-Rise provides the perfect pathway to grow and elevate their mobile capabilities.

Compatible with both our ImageView and Image Suite software options, Focus HD Detectors offer several key advantages, like improved image detail with a smaller, 100um-micron pixel pitch, an IP 56 rating for better protection from dust and fluid ingress, and a robust design to protect against drops and bumps.

Visit our website to learn more about our [DRX-Rise Mobile X-ray System](#) and our [Focus HD Detectors](#).
