IMAGING.

# Affordable. Scalable. Versatile.

A Family of DR Solutions for Every Budget.

A man and a woman are in a meeting. The woman, on the left, is pointing with a black marker at a whiteboard. The man, on the right, is looking at the whiteboard. The whiteboard has a line graph with the text "Chance of exact result" written on it. The background is a warm, orange-toned image of the two people.

Carestream Health is a global corporation with more than 100 years of leadership in healthcare imaging. We are over 3,000 professionals strong – all striving to increase the quality of care for patients around the world.

As an industry thought leader, we can offer you a smarter way forward to the future, because we're tuned in to the trends and challenges in the field. We respond with timely, game-changing healthcare solutions. And, all are backed by unsurpassed service and support.

Carestream is committed to helping our customers remain at the forefront of medical imaging – all to achieve higher productivity, effective cost control and outstanding patient care.

## THINK SHARING. THINK X-FACTOR.

Meet the remarkable X-Factor platform. It lets you share the same user interface and wireless detector seamlessly across our entire line-up of DRX products – as well as slide right into your existing equipment. This makes it easy and affordable for you to convert, replace or expand your current systems.

### DR DETECTORS

**The DRX-1 System** is an efficient, economical way to transition to digital radiography. Its wireless DR detector works with existing X-ray equipment throughout the enterprise.

**The Lux 35 Detector** is glass-free and ergonomically designed – making it incredibly light, durable and easy to maneuver for radiographers, while increasing patient comfort.

**Our DRX Detector Family** offers a variety of options to meet the needs of our customers. From shareable, high-performance detectors to budget-friendly options for moving to DR, our detector portfolio offers solutions for every exam type, workflow and budget.

### DRX-LC DETECTOR

Capture long-length images with a single exposure – reducing patient dose, speeding workflow, decreasing repeats, saving exam time and allowing for a higher level of patient comfort.

# Continuing Evolution.

## FULL-ROOM SOLUTIONS

Our X-ray Rooms offer modular, configurable designs, ensuring there's precisely the right solution for your space, workflow and budget. Scalability means that each room can grow with you. And all rooms can be driven by our wireless DRX Detectors – compatible with both table and wallstand Buckys.

### DRX-COMPASS

Navigate new directions in performance and flexibility by stepping up to the benefits of a full X-ray suite with advanced features. With the DRX-Compass, you can experience versatility, quality and functionality that you can rely on through the years and growth of your facility.

Choose the best configuration for your facility and budget.

Maybe your facility's infrastructure or budget doesn't support an overhead tube. No worries – the affordable DRX-Compass floor-mount tubehead has a small footprint and installation is a breeze – making it a great choice for your facility.

### DRX-EVOLUTION PLUS

Our flagship DR Room is a versatile system that allows you to perform a wide variety of general radiographic exams – with remarkable convenience, patient comfort and pristine image quality. You can select a fully automated, partially automated or manual configuration.

### DRX-EXCEL PLUS SYSTEM

The DRX-Excel System delivers affordable versatility for hospitals and imaging centers. It offers you capabilities for general radiography and fluoroscopy exams in a single system – at a very attractive price. It also supports accelerated workflow, high-resolution images and easy, convenient operation.

# Moving Productivity.

## MOBILE IMAGING SOLUTIONS

Look to Carestream for the mobile unit that's the ideal match for your requirements. Choose from reliable mobile systems to convenient DR upgrade solutions designed with a variety of environments in mind. Whatever you need, we offer superb imaging performance on the move.

### DRX-REVOLUTION

The original DRX-Revolution has long set the standard for mobile imaging. And now we've updated the system with exciting new features, including special capabilities just for pediatrics. Designed in strict accordance with dose-safety guidelines, the Revolution automatically determines the shortest effective exposure time. In addition to image processing specific to pediatric views, the brakes and drive motors are quieter now, too – so that your little patients can rest easier.

Who says imaging can't be fun? The Revolution's variety of colorful, whimsical graphics helps put pediatric patients at ease. Contact your local Carestream Representative to see all the designs, plus ordering and installation details.

### DRX-RISE

Fully integrated for value and performance. The DRX-Rise was designed with input from radiographers to deliver improved workflow and seamless operations. And, its full and robust set of features offers a remarkable combination of productivity, power and convenience. The DRX-Rise is where mobility meets versatility.

### WIRELESS DR UPGRADE OPTIONS

The DRX Transportable System/Lite offers an affordable upgrade to DR using a wireless tablet for ultimate flexibility. Move freely around the exam room, the entire radiology department or from suite to mobile units with ease.

The DRX Transportable System/Universal Mobile retrofit kit allows you to upgrade portable analog X-ray systems from almost any manufacturer to the power of DR wireless technology. Easy to install, this innovative kit helps you maximize your investment in your current mobile units.
